CONSTRAINTS ON THE FORMATION OF SMALL SCALE NETWORKS
Whitman Richards

1. Circle of Friends → Variety of Group Structures

- Circle of Friends

- Types of Small Group Structures
  - Random
  - Multi-Scale
  - Small World

2. Generating Functions: What is the rule for creating larger scale networks?
   - Random: add edges with probability, p.
   - Multi-Scale: use degrees of present vertices as probability distribution for adding edges of any new vertex.
   - Small World: .........
   - None of the above

3. What are dynamics of influences and decision-making if social networks are comprised of characteristic types of smaller graphical forms?
