

Reading technical HCI Papers

6.S063 Engineering Interaction Technologies

Prof. Stefanie Mueller | HCI Engineering Group

in teams of 2:

- grab both copies of the paper, read it, and search for the video

prepare a 3 minute google presentation:

- what is the paper about? (reuse part of video)
- how does it work technically?
- how much would it cost to build it yourself?
 - make a list of components you can buy online (with link + price)
 - explain how you would assemble those components to make it work
 - how much time do you think this would take you?
- what are limitations of the proposed work?
 - when would it break or not work?
- what would you do as future work based on what you learned?

add link to your presentation here:

shoutkey.com/**greed**

**<until 2.10pm,
then presentations>**

end.
