Lecture Notes, October 8 – Data-Directed Programming

Strategies for Managing Data Complexity

- Separate specification from implementation
- Procedural interface to data (enables alternative representations)
- Manifest typing (enables multiple representations)
- Generic operations
 - Dispatch on type
 - Table-driven generic interface (**Data-Directed Programming**)
- Packages
- **Closure**
- **Coercion**
- **Message-Passing**

Rectangular Package

```
(define (install-rectangular-package)
  ;; Internal rep: RepRect = Sch-Num X Sch-Num
  ;; internal procedures on RepRect...
  (define (make-from-real-imag x y) (cons x y))
  (define (real-part z) (car z))
  (define (imag-part z) (cdr z))
  (define (magnitude z) (sqrt (+ (square (real-part z)) (square (imag-part z)))))
  (define (angle z) (atan (imag-part z) (real-part z)))
  (define (make-from-mag-ang r a) (cons (* r (cos a)) (* r (sin a))))

  ;; interface to the rest of the system
  ;; External rep: Rectangular = 'rectangular X RepRect
  (define (tag x) (attach-tag 'rectangular x))
  (put 'real-part '(rectangular) real-part)
  (put 'imag-part '(rectangular) imag-part)
  (put 'magnitude '(rectangular) magnitude)
  (put 'angle      '(rectangular) angle)
  ; Constructors: Sch-Num, Sch-Num -> Rectangular
  (put 'make-from-real-imag 'rectangular
       (lambda (x y) (tag (make-from-real-imag x y))))
  (put 'make-from-mag-ang 'rectangular
       (lambda (r a) (tag (make-from-mag-ang r a))))
  'done)

;; External constructor: Sch-Num, Sch-Num -> Rectangular
(define (make-from-real-imag x y)
  ((get 'make-from-real-imag 'rectangular) x y))
```

Operation/Type Table

--

Trace the evaluation of `(define my-z (make-from-real-imag 3 4))`

--

Data-Directed Generic Operations

```
(define (real-part z) (apply-generic 'real-part z))
(define (magnitude z) (apply-generic 'magnitude z))

(define (apply-generic op . args)
  (let ((type-tags (map type-tag args)))
    (let ((proc (get op type-tags)))
      (if proc
          (apply proc (map contents args))
          (error "No method for types - APPLY-GENERIC" (list op type-tags))))))
```

Trace the evaluation of (real-part my-z)

Complex Package - generic arithmetic

```
(define (install-complex-package)
  ;; Internal Rep: RepComplex = Rectangular U Polar
  ;; import from rectangular and polar packages
  (define (make-from-real-imag x y)
    ((get 'make-from-real-imag 'rectangular) x y))
  (define (make-from-mag ang r a)
    ((get 'make-from-mag-ang 'polar) r a))

  ;; internal definitions...
  (define (add-complex z1 z2)
    (make-from-real-imag (+ (real-part z1) (real-part z2))
                          (+ (imag-part z1) (imag-part z2))))
  (define (sub-complex z1 z2)
    (make-from-real-imag (- (real-part z1) (real-part z2))
                          (- (imag-part z1) (imag-part z2))))
  (define (mul-complex z1 z2)
